Talent for Technology

Junior/Senior Frontend Developer (ES-3354)

We are searching for talented candidates on behalf of our multinational partner company which is an innovative research company to fulfill the following position:

Junior/Senior Frontend Developer

Responsibilities:

- Developing new, highly dynamic visualizations and presentation formats to facilitate the interpretation of different types of data for the client
- Participate in the planning/designing of new features
- Implement new features for one or more component of the system
- Test newly created features
- Participate in bug fixing of the newly developed features
- Deploy the stable versions of our live platform
- Support the already existing functionalities and the operations team
- Deploying software on a large scale through the Cloud

Requirements:

- JavaScript: Some practical coding experience, with knowledge about jQuery (HTML/CSS knowledge is also needed)
- Solid university-level understanding of OOP
- Basic experience in building modern web applications (client-side in JavaScript, server-side C#/.NET)
- Understanding of relational databases (MS SQL)
- Able to work with frequently changing requirements
- Open to on-demand changes in tools, technologies and languages
- Cheerful and outgoing with great communication skills
- Fluent in english

Advantages:

○ Knowledge of React and TypeScript – our partner uses these actively during job

○ Knowledge of JS development best practices

○ University degree in Computer Science or equivalent

○ Knowledge of Net.Core according to Amazon "serverless" principals – the company will use it in some months.

What they offer:

○ The chance to work in a young but well-established international company, where what you do has a direct and immediate impact

○ A highly supportive culture led by a young and dynamic international leadership, keen to invest in you

○ A fun team with varied interests, who enjoy getting together outside of work

○ A competitive compensation package, flexible working culture and unlimited holidays' policy

○ We ensure that our developers have access to all the tools they need

○ A development budget to take on additional training or attend conferences outside of work
